Questronix Corporation

Greetings!

I am **Al Francis B. Paz**, a **Computer Engineering** graduate at **Ateneo de Naga University**, and I would like to express my interest in the **Software Engineer Trainee** position at Questronix Corporation. I believe that your organization can provide me with valuable hands-on experience and professional growth.

During my time in the university, I focused heavily on backend software development, database management, and full-stack systems integration. For my senior thesis project, my team and I successfully built a Real-Time Student Shuttle Monitoring and Tracking System. In this role, I served as the technical lead and backend developer, where I engineered robust APIs using Java Spring Boot and managed relational data tracking with PostgreSQL.

Additionally, I have practical experience handling hardware-to-cloud telemetry and configuring centralized hosting environments. This academic and practical background has given me a deep understanding of standard software architectures, database optimizations, and the importance of writing clean, scalable code.

Questronix's reputation for mentoring technical talent and delivering high-value digital transformations aligns perfectly with my professional goals. I am highly motivated to learn from your experienced team of engineers, adapt quickly to your established workflows, and contribute to your ongoing enterprise projects.

Thank you for your time and consideration. I look forward to the possibility of discussing how my technical skills and enthusiasm for software engineering can add value to Questronix Corporation.

Sincerely yours,

AL FRANCIS B. PAZ
